AASTMT Digital Transformation in the Digital Revolution Era

AASTMT leadership in AI education continues as usual by further introducing AI into the learning process to help students and lecturers. Data references, video learning and a lot of content supported by the leading e books platform across UK, equipping students to the world of tomorrow and opening up the world of opportunity to AAST students and staff.

AASTMT extends its digital transformation policy by its collaboration partnership with the electronic platform kortex that provides a plethora of features that surpass all expectations. Kortext will embed its platform within AAST's ecosystem, delivering a phenomenal experience for students and staff alike, increasing engagement and driving positive academic outcomes. It includes all prescribed ebooks from the world's leading publishers, it will provide all students and staff with access to the platform with cutting edge premium features, it will enable upload in- house publications and course materials, it streamlines course preparation and enhances teaching effectiveness. AAST students can access their e textbooks on any device anytime anywhere. They can also work offline without wifi as books and material can be downloaded.85% use Kortex in UK. The academy will assign student ambassadors to train the students on using such features.
