October 1996

A bachelor's degree in International Transport & Logistics Department of Management and Economics, at the College of Maritime Transport in Alexandria.

January 2003

For the first time, The Supreme Council for the Egyptian Universities accreditation for a bachelor degree for two years in International Transport & Logistics with one major «Logistics Management and International Transport»

October 2007
May 2008

Establishment of the College of International Transport & Logistics with one educational department (International Transport & Logistics), and one major (Trade Management & International Transport)

Our JOURNEY

October 2011

Renewal of the bachelor degree in Management of Trade Logistics & International Transport in its departments and majors : Transport Logistics Management Dept., logistics and supply chain management Dept. and International trade logistics Management Dept.

November 2013

Accreditation of National Authority for Quality Assurance & Accreditation of Education (NAQAAE) for the first time in the history of the Academy.

June 2019

A new major, which is the «Management of Energy & Petroleum Logistics.»

Dean Word

The Transport and Logistics system is one of the most important pillars on which international trade relies. Nowadays it has become a major trend for the Arab Republic of Egypt.

Egypt's geographical location qualifies it to be a global hub for trade. This requires a modern and developed transport and logistics system, which Egypt carries out, such as the new Suez Canal, the promising economic zone next to it, East Port Said Port, its new Suez Canal, land transport network, new airports, the new city of Alamein and other projects.

The College of International Transport and Logistics is a professional entity specializing in teaching the multidisciplinary fields of Logistics and supply chain management.

The Departments are Logistics of International Transport, Logistics & Supply chain Management, Logistics of International Trade and Energy & Petroleum Logistics Management.

The College is an educational center and an expert house aimed at serving the industry in the field of International transport, logistics, and auxiliary sciences such as economy and law in Egypt and the Arab world, through the provision of specialized educational programs in addition to providing training, research, and advisory services in this specialty.

Our ambition has no limits in the development and expansion of international transport facilities and logistics following the objectives set locally and internationally, where the College has witnessed many credits and partnerships with several universities worldwide.

The CITL welcomes you to join us in sharing our enthusiasm, our future aspirations, our achievements, and our great ability to do much to solve the problems facing people all over Egypt, the Arab world, the Middle East, and Africa.

Prof. Sara El-Gazzar
Dean of the College

Our VALUES

Alignment

The college seeks to achieve a high degree of integration and convergence among the college and its academic family around the strategic goals and works to achieve them.

Leadership

The College believes that sincerity, dedication, and belonging to the College and the Academy are our ways of achieving leadership at the local and regional levels. The college works to provide a model of rational leadership at all levels. The college seeks to offer study programs aimed at developing leadership skills for its graduates, faculty members, and staff.

Excellence and Sustainability

The college believes that excellence in the fields of education, research, development, and innovation is our way to achieve leadership among colleges and educational institutions in the Arab world. The college believes that excellence must be reflected in our relationship with the larger community through our diverse practices in the field of social responsibility.

Dignity

The college seeks to adhere to ethical standards in all educational practices and administration, inside and outside the college and academy.

Respect

The college thinks that the work of the college and the academy is based on respect between all people and organizational units.

Accountability

The college thinks that each of us, within the limits of our jobs, is responsible for the success of the college and the academy as an institution.

Knowledge

The college believes in digital transformation and creating a smart digital college capable of dealing with a high degree of excellence and the requirements of modern universities in the era of knowledge.

06 | **Advisory
Board**

Why

College of International Transport & Logistics - CITL?

01

**Accreditations
(National & International)**

Bachelor's degree accredited by:

- » Egyptian Ministry of Higher Education
- » Saudi Ministry of Higher Education
- » Ministry of Higher Education in the Sultanate of Oman (Alexandria campus)
- » Accreditation of the Supreme Council of Egyptian Universities, the first college in Egypt to obtain international accreditation in field of Logistics
- » Golden FIBAA - The Foundation for International Business Administration

Accreditation

- » National Authority for Quality Assurance and Accreditation of Education (NAQAAE)
- » Accredited by (AACSB - Association to Advance Collegiate Schools of Business) exclusively in the Middle East specialized in Logistics

**AACSB
ACCREDITED**

02

Professional Certificates & EU Collaboration

College of International Transport & Logistics - CITL offers International professional certificates in freight forwarding (FIATA) and higher FIATA (supply chain management in supply chain) diplomas. Moreover, professional certificates in road transport (IRU). In addition, CITL is a major partner in multiple international projects especially, European Union (EU) projects.

03

Entrepreneurship Programs

- » College offers the Entrepreneurship course as a basic course for students studying at the college.
- » College participates in the initiative of the Union of Arab Chambers and UNIDO to launch programs to support and small and medium enterprises in Egypt and the Arab world.
- » College contributes to the activities of the academy's supply chain incubator.
- » The college annually participates in Egypt's Rally competition for entrepreneurship.
- » College participates annually in organizing the Arab Rally Program. By presenting distinguished graduation projects - which are applied research projects - to participate in the rally competition carried out by the Entrepreneurs Center

04

Training & Community Service

The College, provides practical training to its students in various companies and organizations inside or outside Egypt at an international level. It also provides for holding many workshops presented by industrialists to link the academic side to the practical side correlated with the needs of the market, where training is mandatory for college students and one of the main requirements for graduation. The college provides training opportunities inside Egypt in all companies and bodies related to the student's academic aspect, whether in the field of ports, import and export, industrial companies, service companies, oil and energy logistics fields, logistics and supply chains, and others. It also offers international training in many international destinations such as ESCOLA (Spain), UCLan (UK), Maribor (Slovenia) and Chang 'an (China).

05

Student Activities

- » The college is keen to provide academic guidance, care and support for students in sports and cultural activities
- » The college forms an annual student council by election
- » The college arranges scientific and recreational trips such as (East Port Said Seaport - Sokhna Port - Alexandria Port Authority - Suez Canal Company for Container Handling - East Port Said Development Company).
- » It is keen to support students with special needs and to represent them in the Students' Union and other various activities
- » Participation of the students in the Academy's Colleges League in games (volleyball - basketball - five-a-side football - beach ball - football - handball). Also, it supports and sponsors sports champions (the champions of the Tokyo Olympics 2020)
- » The college periodically organizes a week of CITL Week activities, includes honoring our outstanding students in various fields, whether scientifically, mathematically, culturally or socially.

06

Advisory Board

The Academy believes in the necessity of linking the academic side with industry. Thus, the Advisory Board of the College of International Transport and Logistics was formed, which includes experts from the industry.

► Aims of advisory board ◀

- Support the college in developing its curricula.
- Presenting the most important problems and topics in the transport and logistics sector that need research.
- Agreeing on the research points for the graduation projects.
- Setting certain specifications for college graduates according to market requirements.
- Extracting results and solutions to reinforce the transport and logistics sector.

International Partnerships

College of International Transport & Logistics - CITL has many scientific partnerships with European and foreign universities such as University of Huddersfield, University of Plymouth, University of Hull, University of Chang 'an, and others.

These partnerships contribute to:

- » Scholarships for students
- » Internship Training
- » Scholarships for master's and doctorate for college members

HULL dual degree program is a combination of two separate degree programs and allows students to complete both in a shorter amount of time than if they attended each degree program separately.

By getting two degrees, you allow yourself more opportunities, simply because you are not limited to just one particular set of skills.

Why Hull Program

- » By studying Supply Chain Management at Hull, you will benefit from exciting key links to professional bodies such as Chartered Institute of Logistics and Transport (CILT) and Chartered Institute of Procurement and Supply (CIPS). It gives you exemptions for examinations and membership of professional bodies, making the path to your future career much smoother.

» Hull is a hub of Britain's logistics and supply chain network with major port complexes linking the Humber to global trade and business routes. They have developed strong links with these organizations, so you will have no shortage of opportunities to get hands-on experience.

» Innovative teaching focused on practical and problem-solving orientation relevant to current and future supply chain challenges (e.g. social media, social networks, digital tools, renewable energies, global and ethical sourcing and distribution).

» We want our graduates to go on to get great jobs once they have left us. We are focused on providing the skills, facilities and experiences you need to give you the very best start to your career, so you can become an authority in the world of logistics and supply chain management.

» At Hull, your learning will come with a strong practical emphasis on problem solving. You will learn how to manage complex supply chains and the interconnected relationships among different stakeholders.

— Discover your Career Path —

Logistics graduate's career path can focus on a wide variety of functional areas. Some these include;

- » Transportation management.
- » Warehouse operations management.
- » Imports and exports management.
- » Inventory planning and control.
- » Purchasing and materials management.
- » International logistics management.
- » Production planning and operations.
- » Supply chain management.
- » Customers service management.
- » Insurance management.
- » Stock markets, marketing and sales.
- » Freight forwarding operations.
- » Shipyards and Cargo Handling.
- » Administration of marine activities in ports, transport and storage of all kinds
- » Handling types of contracts between exploration companies and countries that own energy resources.
- » Manage budgets, costs, marketing and pricing of energy products.
- » Department of Health, Safety, Security and Environment.
- » Emergency and rapid logistical response teams specialized in crisis management and facing any emergency events such as an oil spill.
- » Manage logistics IT systems

College of International Transport and Logistics Departments:

» Transport Logistics Management Department (TLM)

Provides students with broad knowledge of transportation methods and focus on transport logistics skills and specialized knowledge in port management, cargo handling, multimodal transport management and shipping management Projects.

Study plan

Year 1

Semester 1

- Basics of Logistics Management
- Transport Operations Management
- Principles of Management
- Introduction to Economics: Micro & Macro
- Introduction to Information Systems
- Mathematics for Business

Semester 2

- University req. elective course (1)
- Introduction to Energy Management
- Academic English
- Logistics Operations Management
- Ports and Terminals Operations Management
- Financial Accounting

Year 2

Semester 3

- Communication and Presentation Skills
- Introduction to Business Law
- Cost & Managerial Accounting Fundamentals
- Applied Statistics
- Transport Economics
- Cargo Handling Management

Semester 4

- Academic Writing
- Logistics Information Systems
- Operations Research
- Imports and Exports Logistics Management
- Intelligent Transport Systems
- Transport Geography

Year 3

Semester 5

- Risk & Insurance Management
- Quality Management
- Principles of Marketing
- Inland Transport Management
- Liner Trade Management
- Minor Course (1)

Semester 6

- Research Methodology
- University req. elective course (2)
- Financial Management
- Airports & Airlines Management
- Chartering Management
- Minor Course (2)
- Practical Training

Year 4

Semester 7

- Strategic Management
- Graduation Project I
- Transport Law
- Transport Modeling
- Minor Course (3)
- Elective Course (1)

Semester 8

- Graduation Project II
- Multimodal Transport Management
- Logistics Service Providers
- Minor Course (4)
- Elective Course (2)

» Logistics & Supply Chain Management Department (LSCM)

Provides students with deep understanding of all the activities and functions of the supply chain from procurement management, production management, warehousing management and distribution management to customer relationship management and risk management.

Study plan

Bassant Himeda – CITL graduate

Logistics & Supply Chain Management Department (LSCM)
Graduation class (2019) – GPA: Excellent with honor
Champion of the Mediterranean Games in Algeria 2022
athletics She won two medals at the 2019 African Games
She holds her country's national records in the 100 and
200 metres.

Mohamed Ibrahim Elsayed (KISHO) – CITL student

Transport Logistics Management Department (TLM)
Won the bronze medal at the 2020 Tokyo Olympics.
In 2019, He represented Egypt at the African Games
held in Rabat, Morocco and won the gold medal in
the event. He is a two-time U23 World Champion.

Distinguished Students in Musical Activities

— Basma Ahmed Saber —

Student - Logistics & Supply Chain Management Department

A member of the Light and Hope Orchestra in Cairo, a flute player, has participated in concerts inside and outside Egypt (Switzerland, France, China, and Serbia). Inside Egypt, the ceremony of the World Youth Forum, Cairo Opera, Alexandria, Damanhour, Luxor, and all hotels in Cairo, and the opening ceremony of the Al-Ahly and Zamalek match in the final of the African Champions League in 2020. The orchestra team was honored by President Abdel Fattah El-Sisi. Basma was also honored by the Ministry of Youth and Sports.

— Mohamed Yasser —

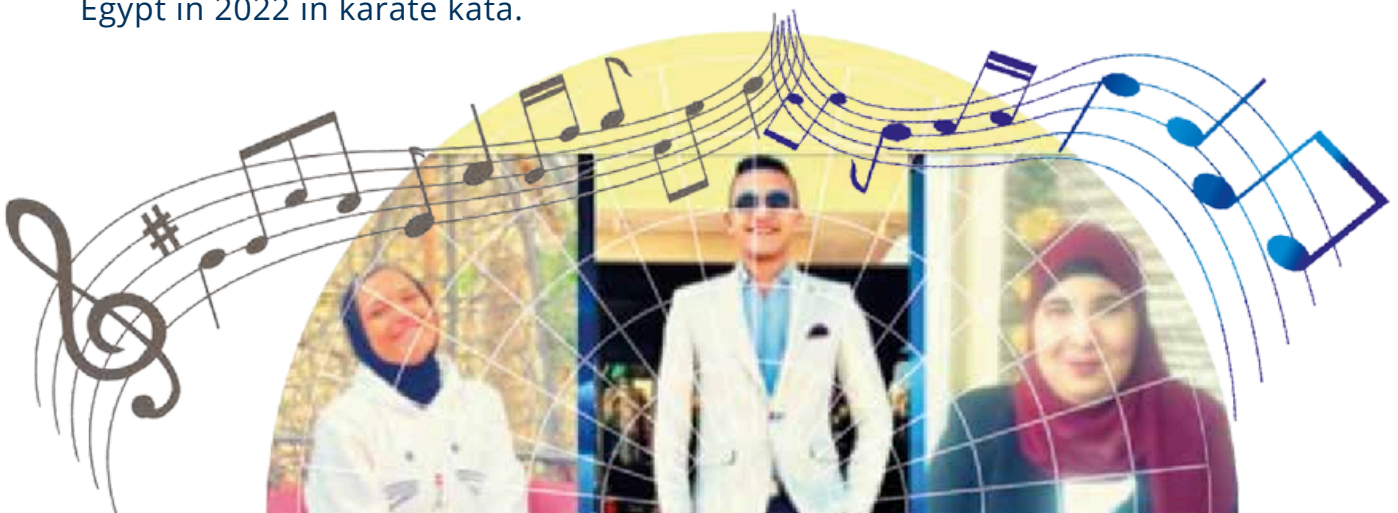

Student - Transport Logistics Management Department

Oud, Guitar and Percussionist, participated in the Egyptian Treasures Competition sponsored by the Ministry of Youth and Sports, and a soloist accompanying the Alexandria Choir

— Hams Hassan —

Student - Logistics & Supply Chain Management Department

In the choir team in addition that she ranked second in the Arab Republic of Egypt in 2022 in karate kata.

— CITL – your window to the world —

The college provides practical training to its students in various companies and organizations inside or outside Egypt at an international level.

Our international training

From Egypt to UK Students obtained theoretical and practical lectures for many logistical activities such as packaging, transportation and storage, with field visits to one of the largest wholesalers and retailers.

From Egypt to Spain

Students obtained summer training at Escola Europea Intermodal Transport. Students learn how to manage port operations for ships and cargo at the Spanish School of Navigation. The training included attending theoretical lectures and field visits to container yards, passengers, and dry and liquid bulk cargo inside the Port of Barcelona, in addition to taking a cruise inside the Port of Barcelona.

From Egypt to USA

Students obtained International training experience at CalPoly Tech University in USA.
