

## 7.4.2 100% Renewable Energy Pledge

### 2023–2024

AASTMT is keen on its long-term goal of achieving 100% renewable energy resources. Hence, each year a new theme and slogan is set by sdg7 team to show the path progressing towards this goal. Moreover, continuous campaigns and initiatives are launched by AASTMT to promote GREEN ENERGY SUSTAINABILITY beyond university walls.

### 2023/2024 Year's Theme

AASTMT 2024 slogan, Towards Efficient, Clean and Renewable AASTMT: “Save Energy, Cut Carbon and Empower with Renewables” perfectly reflects AASTMT’s vision of moving towards an efficient, clean, and renewable future. It emphasizes the importance of responsible energy use and the commitment to reducing carbon emissions through innovation and sustainability. By promoting renewable energy solutions, AASTMT aims to inspire a culture of environmental awareness, energy efficiency, and technological advancement—empowering communities to create a greener and more sustainable world.

### Events Including Campaigns, Initiatives and Competitions

AASTMT is keen on promoting GREEN ENERGY, not only among all its campuses, but beyond its walls through different events including campaigns, initiatives and even competitions!!

**15 Nov. 2023**  
**“Toward a Green and Sustainable Future School Initiative.”**

The closing ceremony of the final phase of the first edition of the “Sustainable Development Initiative for Schools” was held under the title “Toward a Green and Sustainable Future School Initiative” in AASTMT – Abukir Campus where participants presented their innovative projects. This initiative was launched in 2022 and included three awareness stages for students and teachers in schools. The initiative aimed to spread the culture of sustainability through training, workshops, and participatory activities. It also provided an opportunity for school students to present their innovative ideas and projects during the implementation stage.
