SDG 9

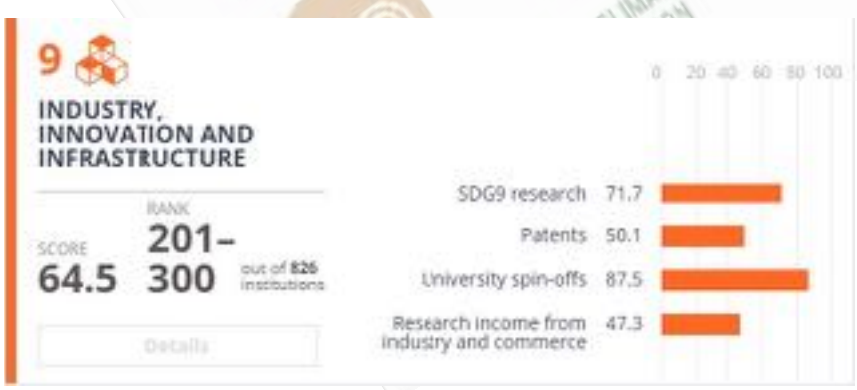

Our Aim in 2024-2025

During the academic year 2024–2025, the Arab Academy for Science, Technology and Maritime Transport (AASTMT) continued to strengthen its contribution to Sustainable Development **Goal 9 (SDG 9): Industry, Innovation and Infrastructure,** which focuses on building resilient infrastructure, promoting inclusive and sustainable industrialization, and fostering innovation. AASTMT advances this commitment by integrating research, technological development, entrepreneurship, industry collaboration, and capacity building across its academic and institutional activities.Through applied research, innovation-driven programs, startup and spin-off support, industry partnerships, and the development of future-ready skills and infrastructure, the Academy works to bridge the gap between academia and market needs while contributing to sustainable economic development in Egypt and the wider Arab region.

Entrepreneurship is a key pillar of AASTMT's contribution to SDG 9. Through its entrepreneurship ecosystem, the Academy supports students, researchers, and startups in transforming innovative ideas into viable businesses and market-ready solutions. Through incubation, acceleration, mentorship, investment opportunities, and industry partnerships, AASTMT strengthens innovation-driven enterprises and connects academic knowledge with real market needs.

These efforts contribute to **innovation, sustainable economic growth, job creation, and technological advancement,** reinforcing AASTMT's role as a leading regional platform for entrepreneurship and innovation.

Scores 2024-2025

SDG 9

INDUSTRY, INNOVATION AND INFRASTRUCTURE

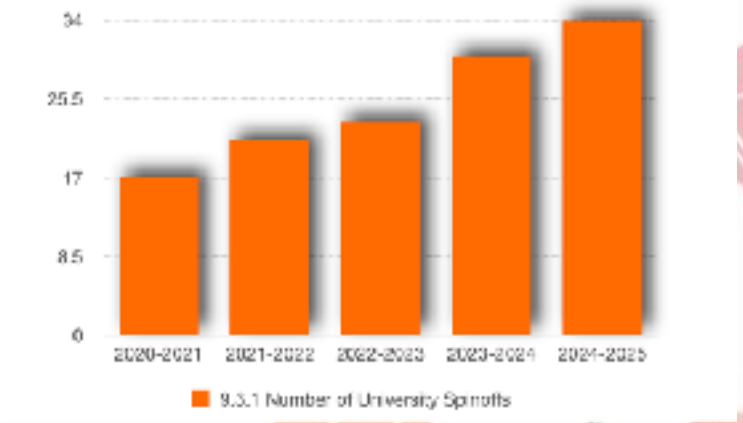

Key Milestones in 2024-2025

1.AASTMT - Entrepreneurship Center Spin-Offs

Spin-offs, Progress Over the last 5 Years

METRIC/INDICATOR	2020-2021	2021-2022	2022-2023	2023-2024	2024-2025
9.3.1 Number of University Spin-Offs	17	21	23	30	34

Photon Smart Photon Smart is a fabless IoT manufacturer that specializes in Smart Homes. We exist to drive the smart homes industry into the next phase: becoming accessible, user-friendly and affordable enough to become mainstream.

Brainfix 65% of children leave rehabilitation because traditional therapy doesn't engage the brain. Brain Fix changes that.
We've built the world's first system that reconnects the brain to muscles using muscle preparation, VR, AI, and robotics—closing the neural loop other solutions ignore.

MyVarm MyVarm (My Virtual Farm) is an Agritech company, offering convenient farming in urban areas in order to achieve proper utilization of extra spaces by providing means to grow healthy food using sustainable methods in small scale while providing a new source of income to our ecosystem (Growers, Suppliers, Agri experts and Urban location owners).

Vitrine Furniture Vitrine Furniture is a tech-driven online and offline managed furniture marketplace in Egypt that helps customers find affordable, modern furniture and enables local suppliers to reach more buyers.

OZY OZY adventures is a tourism company specialized in adventure travelling inside & outside Egypt, retreats, and extreme sports trainings.

NABTAX NABTAX transforms unused urban spaces — rooftops and hangars — into fully connected smart farms.

EMDS EMDS develops a robotic surgery training platform designed for medical schools, teaching hospitals, and surgical training centers. The platform combines realistic simulation with haptic devices to teach core robotic surgery skills such as camera control, instrument manipulation, peg transfer, and suturing.

CY Guard CyberGuardX Academy is a leading cybersecurity training provider dedicated to empowering students and professionals with practical skills and internationally recognized certifications.

P-Vita Patented AI and IoT-driven bioconversion technology turning algae and agricultural waste into high-value natural raw materials, for Green Intelligence Technology.

Amwal is a Crowd-Lending Platform That Allows Individual Investors to Invest in Short-Term Loans of Small & Medium Companies.

The Align We have created a new device that revolutionizes dentistry by providing instant feedback to the student if he makes a mistake in his job at the pre-clinical stage or in the clinic, because there is no device in the dental field that performs the same function and students rely on feedback from the teacher or via the internet and videos.

SUPER NOVA is an all-in-one digital marketplace designed specifically to address the needs of communities, consumers, small businesses, and service providers across Upper Egypt.

NEOCER A genetic analysis device for indicators that lead to early detection of cancer Neocer introduces a smart, portable system for regular early cancer screening based on microRNA analysis.

SNOHE ROBOTICS To address the critical challenges in rehabilitation, SNOHE ROBOTICS has developed the Tronix AX3, an advanced, fully integrated robotic rehabilitation device.

BOYOT provides Real Estate businesses with solutions for all their property management needs.

Taiseer is an innovative fintech startup revolutionizing micro-savings through gold investment. Based in Egypt, Taiseer offers a Sharia-compliant mobile application that enables users to save and invest in gold through small, flexible contributions.

SugarHeal is at the forefront of sustainable healthcare innovation, offering advanced wound care solutions through biodegradable patches and 3D printing inks.

Mansaj is an Egyptian sustainable social enterprise and textile startup based in Cairo. Founded with a mission to bridge ancient traditional craftsmanship with modern design.

Schoolz is an AI-powered platform that revolutionizes school and corporate transportation - making it safer, smarter, and sustainable.

Venu MENA's #1 platform to bring people together to meet, celebrate or create. We made it easier than ever to find, compare and book any event space on-the go.

Agrona is a startup company manufacturing particleboard wood out of agri-residues without cutting a single tree; Fighting climate change and unleashing the economic potentials of the rural societies.

Adaptgarments is the first brand in Egypt and the Middle East to manufacture special clothes for patients after all kinds of surgeries and fractures.

Viridi tackles the problem of inadequate and inflexible EV charging infrastructure, which is often unreliable, inaccessible, and costly. Their solution is portable EV chargers with high power capacity, adjustable amperage, and wide compatibility, ensuring versatile and efficient charging for various EV models.

Techno Masters Techno Masters is an innovative startup working to transform the smart home experience by making advanced home automation more affordable, accessible, and tailored to the needs of the mass market.

Buildwealth A Fractional Properties Digital Platform, web site and mobile application revolutionary platform unlocking real estate investment for all investment interested personal.

AlProtein in a startup founded at the intersection of biology and AI to turn the world's deserts into climate-smart protein factories.

NovaSec Labs NovaSec Labs is an emerging cybersecurity startup developing innovative solutions that leverage Artificial Intelligence to make penetration testing more intelligent, automated, and effective.

Tatbeek Hardware and platform to measure and enhance manufacturers' productivity using latest technologies including IoT, Cloud computing, data analysis, machine learning, and image processing to maximize efficiency and minimize waste.

Medex Smart Solutions First logistic network connecting the pharmaceutical market, accelerating the capital cycle & reducing the expired medicines cash losses, beside protecting people's health from the harms of the repackaged expired medicines starting from Egypt to the Arabian & African countries.

Goia is a tourism-tech startup from Egypt building a mobile app that acts as a "virtual guide in your pocket." Using AI, AR, and 3D visualization, Goia helps tourists and museum visitors explore cultural heritage sites in an immersive, cinematic way.

Interact Labs Interact Labs develops hardware and software products that enhance collaboration, increase engagement and interactivity through an enhanced user experience.

El-Mawkaa is an intelligent marketplace for building materials. We help contractors, Engineers even property owners to get competitive, accurate quotations for their materials, from our vetted suppliers, in a few minutes in a documented & automated process through our innovation the matching algorithms.

Joseela is an online mall, allowing buyers to buy from their around shops online or take their orders in drive-thru, also for the first time all buyers can get cashback up to 100% for all their purchases process with very easy steps.

Deben Deben is an Egyptian Startup offering a SaaS solution that enables corporate treasuries to access all of company's bank accounts from one view with reporting.

Looking Ahead: Advancing AASTMT's Impact on SDG 9

Building on its achievements during 2024–2025, AASTMT will continue strengthening its role as a regional hub for **innovation, entrepreneurship, applied research, technology and sustainable industrial development**. The Academy's next phase will focus on transforming knowledge and innovation into practical solutions that create stronger connections between academia, industry and society.

Strategic Direction	Moving Forward
Innovation & Applied Research	Strengthen research and innovation that respond to real industrial, technological and societal challenges.
Entrepreneurship & Startup Growth	**Expand incubation, acceleration, investment readiness and market-access opportunities for innovative startups and university entrepreneurs.**
Industry & Technology Partnerships	Deepen collaboration with industry, technology partners and innovation ecosystems to accelerate knowledge and technology transfer.
Future Technologies & Skills	**Expand capabilities in AI, digital transformation, smart manufacturing and emerging technologies through education, training and practical applications.**
Sustainable & Inclusive Innovation	Support solutions and infrastructure that contribute to sustainable industrialization while expanding innovation opportunities across communities and regions.

AASTMT remains committed to turning knowledge into innovation, innovation into opportunity, and opportunity into sustainable impact — contributing to a more resilient, inclusive and technology-driven future.
