14.3.3 Maintain Ecosystems and their Biodiversity (Direct Work)

2024/2025

In the World Fisheries Day: AASTMT–Damietta Dialogue on Sustainable Fisheries and Aquatic Resource Conservation

Date: 21 November 2024 (World Fisheries Day)
Location: Damietta Governorate, Egypt
AASTMT Role: Institutional representative and prospective cooperation partner.
Representing AASTMT: College of Fisheries and Aquaculture Technology (CFAT).
Other Party: Governor of Damietta, Egypt.
Nature of Activity: Institutional meeting and discussion on fisheries and aquaculture development.

On 21 November 2024, coinciding with World Fisheries Day, representatives of the College of Fisheries and Aquaculture Technology (CFAT), Arab Academy for Science, Technology and Maritime Transport (AASTMT), met with Her Excellency the Governor of Damietta to discuss opportunities for cooperation in sustainable fisheries and aquaculture development.

The discussions addressed strategies to promote responsible fisheries management, conserve aquatic resources, strengthen capacity-building opportunities, and support employment prospects within the fisheries and aquaculture sectors.

The meeting also explored potential collaboration between Damietta Governorate and AASTMT to facilitate knowledge exchange, strengthen institutional cooperation, and support the sustainable development of the fisheries and aquaculture sectors in the governorate.

The college regularly represents Egypt in Working Groups on Stock Assessment (WGSA) for Demersal Species (WGSAD) and Small-Pelagic Species (WGSASP), organized by the General Fisheries Commission for the Mediterranean (GFCM), Food and Agriculture Organization of the United Nations.

Meeting Dates: 8–13 December 2025
Location: Metropolitan City of Rome Capital, Italy
Organizing Body: General Fisheries Commission for the Mediterranean (GFCM)
AASTMT Role: Scientific participants and institutional representatives.
AASTMT Representatives:

- Prof. Hatem Hanafy Mahmoud
- Dr. Reda Magdi Fahim

The Arab Academy for Science, Technology and Maritime Transport (AASTMT), through its College of Fisheries and Aquaculture Technology, was represented by Prof. Hatem Hanafy Mahmoud and Dr. Reda Magdi Fahim at the General Fisheries Commission for the Mediterranean (GFCM) Working Group on Stock Assessment of Small Pelagic Species, held in the Metropolitan City of Rome Capital, Italy, from 8 to 13 December 2025.

The meeting provided a scientific platform to discuss the assessment of small pelagic fish stocks, exchange fisheries research expertise, and address approaches to sustainable fisheries management and the conservation of marine living resources in the Mediterranean region.

Through the participation of its academic representatives, AASTMT contributed to regional scientific exchange and strengthened its engagement with international fisheries research and stock assessment activities.

AASTMT Fisheries Expert Contributes to Egypt's Environmental Sustainability Strategy 2024–2027

On 14 Jan 2025, the Arab Academy for Science, Technology and Maritime Transport (AASTMT) participated in high-level consultations with H.E. the Minister of Environment through a specialized advisory team, contributing scientific and technical expertise to the implementation of Egypt's Governmental Program 2024–2027, aligned with the Sustainable Development Strategy: Egypt Vision 2030. As fisheries experts on the AASTMT advisory team, they contributed to discussions on sustainable fisheries management, responsible use of marine resources, and the conservation of marine biodiversity. The consultations emphasized the importance of science-based solutions and academic expertise in addressing environmental challenges and strengthening the resilience of marine and coastal ecosystems.

The meeting also highlighted the role of collaboration between government institutions and academic organizations in developing practical approaches to marine environmental protection and sustainable resource management. This engagement reflects AASTMT's commitment to translating scientific knowledge into policy-oriented solutions, supporting national environmental priorities, and advancing sustainable development in Egypt. Through its contribution to the Governmental Program 2024–2027, AASTMT reaffirms its role in supporting Egypt Vision 2030 and promoting the long-term conservation of marine resources for future generations.

AASTMT attended the 82nd MEPC meeting on behalf of IAMU

The Arab Academy for Science, Technology, and Maritime Transport (AASTMT) actively participates in the International Association of Maritime Universities (IAMU). It represented the IAMU at the Marine Environmental Protection Committee (MEPC) during its 82nd session, held from September 30 to October 4, 2024, in London, UK. Senior Lecturer Mohamed Elbawab, a member of AASTMT's SDG 14 team, represented IAMU. Several key environmental issues were discussed, including harmful aquatic organisms in ballast water, air pollution prevention, ship energy efficiency, reduction of GHG emissions from ships, follow-up on the Action Plan to address marine plastic litter from ships, reduction of underwater radiated noise from commercial shipping, pollution prevention and response, and the identification and protection of Special Areas, ECAs, and PSSAs. The committee's final report is available via the following link for those with an active IMODOCS account.

Integrating Sustainable Development Goals in universities to enhance climate change management “INVOLVE.” (2021 - 2024)

The mentioned research project aims to:

- Embody the principles of the environmental SDGs through organizational governance and strategic management of Egyptian universities to ensure their strategies align with the SDGs.
- Establish the Sustainable Development Center (SDC) in Egyptian universities to enhance organizational and internal capacity and ownership of the environmental SDGs, providing the necessary knowledge, skills, and motivation to understand and address them.
- Foster the achievement of environmental SDGs in Egyptian universities by increasing their operational capacities to develop environmentally sustainable campuses.
