

16.2.4 Participatory Bodies for Stakeholder Engagement

2023–2024

Participatory bodies are fundamental to fostering meaningful stakeholder engagement. By promoting inclusivity, transparency, and collaboration, they contribute to more effective governance and a more equitable society. Also, now part from AASTMT Community and participatory bodies are the refugee's students who continue their education in Egypt. The role of participatory bodies is increasingly recognized as vital in addressing complex social, economic, and environmental challenges.

AASTMT New Co-operational Agreements

AASTMT president signed 2 new agreements on the sidelines of the International Conference of Machine Intelligence and Smart Innovation (ICIMISI) the agreement with Cyber Security Company and Italian University. The conference serves as a digital platform for sharing research advancements and developments in Artificial Intelligence and Machine Learning.

The 2024 International Conference on Machine Intelligence

The 2024 IEEE International Conference on Machine Intelligence and Smart Innovation (ICMISI 2024) will provide an excellent international forum for sharing knowledge and results in the theory, methodology, and applications of Artificial Intelligence, Machine Learning, Biomedical

Engineering, and Smart Innovation. The Conference looks for significant contributions and participation to all major fields of Artificial Intelligence and Machine Learning in theoretical and practical aspects. The Conference aims to provide a platform for researchers and practitioners from academia and industry to meet and share cutting-edge development in the field.
