<h1 style="color:red; text-align:center">AASTMT Public Activities
(Public lectures, Community Educational Events)</h1>

## COMMUINTY EDUCATIONAL EVENTS

1) As a new contribution in its leading role in offering higher education standards and spreading the information technology, AASTMT established the first Regional Informatics Center (RIC) in the Middle East and North Africa RIC is a division of the Arab Academy for Science and Technology founded in 2001 and located in Alexandria, Egypt. The Academy is aware that this new century has brought with it enormous revolutionary changes and developments in all field of human knowledge specifically the field of informatics. The idea of establishing the Regional Informatics Center (RIC) originated from the desire to catch up with the amazing development in this field, to help in promoting the minds and talents of the AAST students, and the necessity of creating a broad base of distinguished students who can catch up with the increasing acceleration in the development of Informatics and Robotics worldwide. **The Arab Academy for Science and Technology through its Regional Informatics center is the Headquarter for the ICPC Foundation Competitions for University students in Africa and Arab Countries hosting and organizing the national competitions under ministries of education and telecommunication in every country**. https://aast.edu/en/centers/ric/

RIC organizes the following events :

    a- Beaver Challenge is an international initiative aiming to promote informatics and computational thinking among school students at all ages. It is organized in over 50 countries (3 million participants) and designed to get all students excited about computing. Each participant gets 45 minutes to answer 12 questions that focus on logical thinking and computing.

    b-ECPC (Egypt Collegiate Programming Contest), ACPC (Arab & African Collegiate Programming Contest) programming contest. The contest fosters creativity, teamwork, and innovation in building new software programs, and enables students from different universities in Egypt and Arab region to test their ability to perform under pressure. Quite simply, it is the oldest, largest, and most prestigious programming contest in the world. The contests are hosted by AASTMT every year.

d- RoboCup was founded in 1997 with the main goal of "developing by 2050 a Robot

Soccer team capable of winning against the human team champion of the FIFA World Cup". In the next years, RoboCup proposed several soccer platforms that have been established as standard platforms for robotics research. RoboCupJunior is a project-oriented educational initiative that support local, regional and international robotic events for young students. It is designed to introduce RoboCup to primary and secondary school children, as well as undergraduates who do not have the resources to get involved in the senior leagues. The focus in the junior league is on education.
