## OBJECTIVE:

My own personal philosophy of life as a professor is to be an agent of change. My philosophy of life goes beyond that to include the responsibility of inspiring future agents of change. Although I started my career working in the government sector and I had many opportunities to work in the government sector or consulting in the private sector, but I believed and still believe that there is no other job that directly contributes to a better future than education, training, and research. I see my contributions as not only teaching but also positively impacting the academic community and the students I work with, who engage with me either through teaching or research. I love my job, and I am always willing to help other people to enhance their knowledge and learn from them as well. It is a win-win situation that never disappoints.

## DOB:

November 17<sup>th</sup>, 1976.

## Gender:

Male
